

APPLE /// USERS OF NORTHERN CALIFORNIA
VOLUME 4 NUMBER 1 JANUARY, 1987
CORRECTING PROBLEM WITH DIABLO 630'S

... Some Apple /// owners who have their computers connected to Diablo 630's may have experienced minor errors every now and then in the print out of pages in Word Juggler and other programs. (Particularly true in printing pages with a great deal of single spaced text and bold facing.) By chance, we at last seemed to have cured the problem by making the following change in the System Configuration Program. In System Utilities edit the .PRINTER driver in the configuration block to read as follows:

08 2E 00 00 00.

This is a change from the traditional

08 22 00 00 00

but it seems to work.

Test it out for yourself if you're experiencing such printing problems.
