# **44 BUS MOTHER BOARD**

Originally designed as an expansion bus for an Apple 1 computer. It connects to the 44 pin edge connector of the computer and has provisions for ten 44 pin (.156) connectors, spaced 3/4 of an inch apart. Pin 20 is connected to X, and 22 is connected to Z for power and ground. All the other pins are connected in parallel. This board also has provisions for bypass capacitors.
